-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shaffer in view of Lesiuk, along with Zook '789 and Zook '421.

Shaffer discloses in figures 1-13 a sock, substantially as claimed. However, Shaffer does not disclose the padding being an elastomeric, shaped as a ring, or having an antibiotic therein. Shaffer does disclose that the toe padding 18 can be on the inside of the sock (col. 7, lines 17-21). Lesiuk teaches in figure 1 a sock having padding 4 that is on the inside of the sock. Zook '789 teaches in figure 1 a toe padding that is made of an elastomeric material (viscoelastic gel or thermoplastic). Zook '421 teaches in figures 1-4 a toe padding comprising an elastomeric material having an antibiotic therein (abstract, lines 4-10). It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the elastomeric material as taught by Zook '789 and Zook '421 could be substituted for the padding material disclosed by Shaffer in order to provide comfort between the user's toes. It is old and well known in the sock and stocking art to use nylon to form the sock or stocking. The antibiotic could be used to destroy germs and prevent bleeding while wearing the sock.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. No additional prior art was cited during this office action.
